## VENTILATION AND VACUUM

Ken McCullagh  
Clonlea Lodge  
Dublin

30<sup>th</sup> November 2016

Dear Ken,

I am pleased to provide a quote for the supply & installation of our central vacuum system.  
Your quote is based on the following

- 3/4 wall inlet points
- HomecAir Tecno Style 250 unit in utility.
- Deluxe hose with "Hand Controls".
- Special Kit.
- Vacpan.
- Guarantee period three years.

**Special Price £1,360.00 (Excl. VAT)**

.

Decorative inlets are available at additional charge.  
Homecare Central Vacuum unit can be positioned in detached garage at additional charge.

Conventional vacuuming absorbs dirt, however a considerable part of this dirt is expelled as dust in your home. With our system this does not happen since the dirt and dust are taken along the piping to the central vacuum unit installed in an out-of-the-way location. This means less dust after vacuuming and **cleaner air for breathing (thus contributing to the elimination of respiratory illnesses, asthma, allergies, etc.)**

On confirmation of order we recommend a brief site meeting to detail exact placement and number of points, and to confirm that you are satisfied before we proceed. A 50% deposit is required before commencement with balance payable on completion.  
Our installation team will fully install the above system.
