WINDOOR is pleased to offer high quality, energy-efficient windows and doors. Our products in New Line 68 and Thermo 88 systems are manufactured from laminated pine, meranti and oak. We equip our products with German envelope fittings ROTO NT or Siegenia Titan AF. All our products are factory finished with 4-layer waterborne, transparent or opaque paint system supplied by PPG Sigma Coatings. As standard our windows are equipped with 3-gasket system between frame and sash and also a modern drip cap Guttman Spree 24. This ensures high airtightness and soundproofing. Standard low emission glazing packages are: New Line 68 (4-18-4) - $U_g=1,1$ W/m²K, Thermo 88 (4-18-4-18-4) - $U_g=0,5$ W/m²K (acc. norm EN 673). Approximate heat transfer coefficient U_w is specified next to each position in the offer.

Price include set of handles and hinge caps.

Windows are viewed from the inside, doors are viewed from the side of hinges.

Lift and sliders are tested under maximum pressure of 600 Pa.

Total net value euro = € 358.05

Our products were tested according to norm PN-EN 14351-1+A1
Please check products' compatibility with project's requirements
