### Averaged U-value: 0,82W/m²K

Products where shown "no performance declared" are not included in the overall averaged U-value.

Calculation of U-value in accordance to NS-EN ISO 10077-1, 10077-2 and the programme "Therm".

Centre U-value of glass is calculated in accordance to NS-EN 673.

The calculation methodology is independently quality assured by SINTEF Building and Infrastructure.
